

AXICHAIN TransTrack

PROVIDING UNIQUE TRACEABILITY WHILE LIVESTOCK IS ON THE MOVE

TransTrack connects seamlessly into the mobile National Vendor Declaration (mNVD) creating smooth connectivity for transporters between producers, feedlots, saleyards and abattoirs. Transporters, after accepting a movement, are linked to the chain to ensure full digital movement traceability.

Standalone technology, therefore transporters don't need prior registration to accept, pickup and signoff movements digitally

Access to the consignment details via a SMS or email link

Allows transporters to insert images and comments of livestock during pickup and drop-off

Multiple drivers and handovers are catered for

Peer-to-peer waybill data transfer for offline mode via AXIchain's dynamic QR code technology
